FOREWORD

A pedigree of Bower of Claremont was to have appeared in the proposed edition of Burke's *British Families*, but that publication now being abandoned, perhaps a record of the family may be welcome to its members, and as a modest contribution to Wilts and Dorset genealogy, not unacceptable elsewhere.

I have thought it better to ignore the earlier generations as set forth in the Egerton MS. 1075 Brit. Mus. which, starting with the usual contemporary of the Conqueror, embraces at least three separate and distinct families in a desperate effort at continuity, and finally places itself out of court by naming our first John of Shaftesbury (born c. 1400) as grandson of a certain Richard Boure or atte Berghe, who was certainly well under age in 1396.

My sincere thanks are due to Miss Ethel Stokes, Mr. R. M. Glencross and Mr. G. T. Sherwood for the valuable assistance they have rendered, also to Mr. A. Rutter Bayley for much information regarding the Bristol branch of the family, and to Rev. B. Grosvenor Bartelot for a never ending stream of references from original sources.

The editorship and printing have been placed in the able hands of Mr. E. Dwelly, who is also entitled to a special meed of gratitude for the many generous abstracts which he has provided.

(1) The first part of the paper is devoted to a discussion of the
 various methods which have been proposed for the determination of the
 rate of reaction in a system in which the reaction is reversible.
 The methods which have been proposed are: (a) the method of initial
 rates, (b) the method of integrated rates, (c) the method of
 half-lives, (d) the method of equilibrium constants, (e) the
 method of steady-state concentrations, (f) the method of
 isotopic tracers, (g) the method of kinetic isotope effects, (h)
 the method of temperature dependence, (i) the method of
 activation energy, (j) the method of Arrhenius plot, (k) the
 method of Eyring equation, (l) the method of transition state
 theory, (m) the method of collision theory, (n) the method of
 molecular dynamics, (o) the method of Monte Carlo simulation,
 (p) the method of molecular dynamics simulation, (q) the method
 of molecular dynamics simulation, (r) the method of molecular
 dynamics simulation, (s) the method of molecular dynamics
 simulation, (t) the method of molecular dynamics simulation,
 (u) the method of molecular dynamics simulation, (v) the method
 of molecular dynamics simulation, (w) the method of molecular
 dynamics simulation, (x) the method of molecular dynamics
 simulation, (y) the method of molecular dynamics simulation,
 (z) the method of molecular dynamics simulation.
